

A glass sphere, possibly a paperweight, is shown against a dark background. The sphere's surface is highly reflective, mirroring a vibrant sunset or sunrise scene. The reflection features a bright, glowing sun partially obscured by dark, silhouetted trees. The sky in the reflection is a mix of yellow, orange, and blue, with rays of light emanating from the sun. The sphere's rim shows some internal reflections and a slight blue tint.

Motor Representation and Shared Intention

Two outcomes, A and B,
match in a particular
context just if, in that
context, either the
occurrence of A would
normally constitute or
cause, at least partially,
the occurrence of B or
vice versa.

question:
Which events are joint
actions?

challenge:
How could social motor
representation and
shared intention
harmoniously contribute
to joint action?

premise:
Some joint actions are facilitated by
reciprocal,
agent-neutral
motor
representations
of outcomes
whose obtaining would normally involve action
on the part of each agent

premise:

Reciprocal agent-neutral motor representation
enables some joint actions

“Simulation of another person’s action, as reflected
in the activation of motor cortices, gets stronger the
more the other is perceived as an interaction
partner.”

--- Kourti, Sebanz & Knoblich (2010, p. 4)

premise:

Reciprocal agent-neutral motor representation
enables some joint actions

Kourtis, Sebanz & Knoblich (2010)

Reciprocal agent-neutral motor representation enables some joint actions

****ALT OPENING*

The idea was to start with the most direct question (instead of events, about the relation of directedness.)

What is the relation between a purposive^{joint} action and the outcome or outcomes to which it is directed?

What is the relation between a ^{joint} purposive action and the outcome or outcomes to which it is directed?

What is the relation between a purposive^{joint} action and the outcome or outcomes to which it is directed?

What is the relation between a purposive^{joint} action and the outcome or outcomes to which it is directed?

What is the relation between a purposive^{joint} action and the outcome or outcomes to which it is directed?

What is the relation between a purposive ^{joint} action and the outcome or outcomes to which it is directed?

What is the relation between a purposive ^{joint} action and the outcome or outcomes to which it is directed?

****CUT*

Following can be used to
explain idea about motor
representation and ordinary,
individual intention (not
essential?)

What is the relation between a purposive action and the outcome or outcomes to which it is directed?

What is the relation between a purposive action and the outcome or outcomes to which it is directed?

What is the relation between a purposive action and the outcome or outcomes to which it is directed?

What is the relation between a purposive action and the outcome or outcomes to which it is directed?

What is the relation between a purposive action and the outcome or outcomes to which it is directed?

What is the relation between a purposive action and the outcome or outcomes to which it is directed?

Which events are ^{joint} actions?

Which events are joint actions?

Which events are joint actions?
